INTERVIEW WITH JOSÉ ABASCAL

Director of Salesians Sarrià

Salesians Sarrià provides a post-compulsory educational training offer that allows students to choose the course of education best suited to their professional future and job market requirements.

Salesians Sarrià recently became a member of the UNESCO Associated Colleges Project Network (ASPNet). What added value does this distinction provide to the college?

The UNESCO enshrines the objectives of science, culture and education, taking peace, sustainability, internationalisation and health into account at all times. This year we joined the UNESCO Associated Colleges Project Network (ASPNet), which has acknowledged the work we do, since our college is committed to providing an education based on the values it advocates.

This acknowledgement goes well beyond the academic setting, promoting a more global and values-based education.

As of this year we are part of a network of 10,000 educational institutions in 181 countries whose objective is to work jointly for peace and intercultural dialogue, among other things.

A year has passed since the green roof was installed, what appraisal would you make of this space?

A very positive one. The new green roof has a threefold objective: what matters most to the college is providing Higher-level VET Renewable Energies students with a practical training area, and now they have an area with photovoltaic panels where they can put what they learn in the classroom into practice. Secondly, the green roof is the college's first-ever green area, so now the yard has a green space of almost 200 m² which is also a renewable energy workshop.

The third objective is to provide Sarrià-Sant Gervasi district with a new green area, and ours is the first green roof in the district to win the "Green Roofs" competition organised by the City Council of Barcelona.

IN THIS NEW ACADEMIC YEAR WE WILL BE STARTING THE HIGHER-LEVEL VET AUTOMOTIVE COURSES

One of the actions undertaken to promote sustainability in the college was precisely the creation of the roof. What actions have you scheduled for the future?

After installing the roof, we planted 5 trees on the college's top yard, an action that will enjoy continuity this year with a further 5 trees to be planted in the downstairs yard. Another initiative we are working on is the possibility of building a vertical garden or a metal wall where plants and other vegetable species can be hung. To this end, we are working in collaboration with the Institut de Paisatge Urbà i Qualitat de Vida (IMPUQV) and with the Institut de Ciència i Tecnologia Ambientals (ICTA) to find the best solution for this space at the college.

Another action related to sustainability that we will be implementing is the installation of bicycle and electrical scooter charging stations at the college. In this way, pupils, teachers and administrative and services employees will be able to recharge their vehicles on the college premises. Yet another step in promoting sustainability and non-pollutant mobility through the college.

What activities is Salesians Sarrià engaging in to promote the internationalisation of its pupils?

The college facilitates the internationalisation of its Spanish Baccalaureate students through exchanges. In this 2019-2020 academic year we will have about 80 placements all around Europe, 25 of them in Denmark.

Moreover, we promote internationalisation among our Vocational Education and Training (VET) students by means of stays abroad, and this year we have more than 75 placements scheduled. We also work on joint projects with other colleges, such as a project for the manufacture of a machine by our mechanics department in collaboration with six European colleges.

WE WORK TOWARDS THE INTERNATIONALISATION OF OUR SPANISH BACCALAUREATE AND VOCATIONAL EDUCATION AND TRAINING STUDENTS

How do you address internationalisation in the institutional setting and from the different teaching departments?

Both the management and faculty are committed to forging relationships with European colleges in order to be present in the different education activities related to Vocational Education and Training and Spanish Baccalaureate conducted abroad, such as: fora, visits to colleges and by inviting their representatives to our college. In the first term, we visited Austria through the Talents for Europe programme, four of our teachers visited a vocational education and training campus in Holland and we also attended the Congress of the European Vocational Training Association that was held in the Azores.

Besides the programmes abroad, what actions are you implementing in order to improve language-learning?

Salesians Sarrià is committed to ensuring that its students are proficient in English when they complete their education. This is why we offer extra classes so they can improve their English, French and German. These classes are held at midday and are open to anyone at the college who wishes to improve their proficiency in a foreign language.

The aim is to promote learning through actually speaking the language, rather than based on grammar and spelling, as these aspects are dealt with in the compulsory English classes in their courses.

The International Baccalaureate has become consolidated as one of the post-compulsory education options. What does the Diploma Programme offer pupils?

The International Baccalaureate enables students to attend universities in more than 100 countries all over the world

without having to get their qualification recognised. The international dimension depends largely on each student and whether they want to pursue their education abroad or here. The main goal of these courses is to prepare students to have an international mentality so that they can travel the world independently in the future.

Salesians Sarrià is a college that promotes innovation in the classroom. What methodologies does it employ to do this?

The college promotes teamwork, which is why our courses are based on Project-Based Learning (PBL) in Vocational Education and Training and on Cooperative Learning in the Baccalaureate. These two methodologies work to the benefit of students, because they bolster the skills and competencies now being demanded by companies.

¿What are the main competencies that students pick up working with PBL and Cooperative Baccalaureate?

Students learn to be independent learners and also acquire the capacity to work in teams, two basic competencies they will need when they embark upon their professional career. Through these skills, students will be better poised to rise to new challenges and also to deal with the problems they face in the course of their education successfully. In this way, they learn that the world is not about individuality and that people have to get used to working as a team and with people they do not know.

What is the college's social commitment?

The social vocation is one of the strategic lines of Salesians Sarrià. For this reason, the college is committed to being a supportive institution that is engaged in two volunteer projects: Share the Light and Let's Revise Together. Through these two programmes, our intention is to promote a volunteer work mentality and a supportive spirit among our students.

The director, José Abascal, at a meeting with the assistant director, Francisco Álamo.

01

OUR COLLEGE

Salesians Sarrià promotes sustainability both inside and outside the classroom through specific actions. In 2019, we started the green roof project, a space with a surface area of almost 200 m² which became the college “lung”, and is also a working area for VET students.

The college wants its students to feel part of the Salesian community, which is why we have developed the Pastoral Educational Programme that sets out to provide an all-round person-centred education through different activities. Moreover, we promote internationalisation through different programmes that help to further our students’ international side and allow them to cope successfully in an increasingly more global setting.

SHARE THE LIGHT

OUR COLLEGE

Presentation of Salesians Sarrià

Salesians Sarrià has more than 135 years of experience in post-compulsory education training. In the course of our history, we have always adapted to the needs of society to ensure that our students receive the best possible human and technical education.

Innovation in education is one of the college cornerstones. Our educational offer is underpinned by a **Dual Vocational Education and Training (Dual VET) approach and by Project-based Learning (PBL)** in VET courses and **cooperative learning** in the Spanish Baccalaureate. These two methodologies are focused on ensuring that our students become both renowned professionals and independent and responsible persons.

Our **innovative model** encourages the relationship between the student and the company, since they are brought into contact with each other from the very beginning of the students' education. The Salesians **employment exchange** brings students into contact with companies to facilitate job placement.

Student **internationalisation** is one of the collegemain commitments. Our **International Relations** department works on programmes involving exchanges between students from our college and European students, conversation classes, work-experience programmes for VET students as well as stays in Europe.

SALESIANS SARRIÀ, A REFERENCE CENTRE

- We have an innovative educational action model that is based on the relationship between the student and the company.
- We coordinate work experience and stays in European countries.
- We offer courses in Spanish Baccalaureate, Middle-Level and Higher Level VET and engineering degrees at the EUSS (Escola Universitària Salesiana de Sarrià).
- We issue complementary professional certifications.
- We have a psychopedagogical support and guidance service for students and their families.
- Our employment exchange brings students and companies into contact with each other.

WE HAVE OPENED A NEW ASSEMBLY ROOM

This year we opened a new assembly room. It is a room with capacity for 400 people, boasting the latest technology and equipment required to host different activities.

OUR COLLEGE

Pastoral educational programme

The Salesians Sarrià Pastoral Educational Programme aims to continue to emphasise the importance of sustainability as pivotal in the formation of the individual. The college makes every effort to protect its own environment and also to encourage sustainable habits throughout the educational community.

Salesians Sarrià strives to offer **quality theoretical and technical training** that builds competent professionals, guaranteeing that they have a solid human grounding that will assist them in their maturation process. That is why we strive to follow the person model defined in the era of Don Bosco through the Preventive System: be an honest citizen and a good Christian.

According to this model, the college must be a **space for educational and evangelist innovation and investigation** at the service of young people, families and society at large.

This year, we have focused on how to cope with everyday life. We want to invite people to live intensely, with creativeness and innovation, looking at life profoundly, without giving into temptations such as passiveness, routine, superficiality or the fear of failure.

We chose the slogan "TAKE A RISK, LIVE". It is about opening up your eyes to reality, being committed to enjoying life to and transforming it in a positive way. We need to take risks in order to live our desires and dreams

with passion, to feel full of life and pass this attitude on to other people.

Taking a risk and living means accepting this gift that God gives us to be totally free, and by contending with any difficulties that would thwart us with faith and hope.

You are young, you have many options to choose from in life, to live life to the full...

TAKE A RISK, LIVE

OUR COLLEGE

Sustainable, healthy and supportive college

A MORE SUSTAINABLE COLLEGE

Sustainability is one of the college underpinning values, which is why we are committed to **different initiatives that help to foster sustainable habits** among the educational community. To name but some, in 2019, we installed a green roof, the college first-ever green space. Moreover, we work in raising awareness of the importance of waste and sustainable waste management, prioritising energy-saving..

A HEALTHIER COLLEGE

Salesians Sarrià is part of the **FEM SALUT** programme of the Agència de Salut Pública de Barcelona which sets out to help the community to lead a healthier life. Moreover, our Educational Psychology Service (SAPP) holds Emotional Education workshops designed to help students cope with stress, as well as other aspects that young people are concerned about. The healthier college project also engages families through the organisation of conference cycles about adolescence.

A MORE SUPORTIVE COLLEGE

Support and solidarity are values that we work on every year with our students. We schedule different activities for the entire community so that they can all do their bit in the different projects that we have undertaken in the college or in which we are involved. **“Repassem Junts”, the international volunteer programme “Share the Light”, “Reparem Junts”, the sale of Fair Trade products, food collection, the sale of solidarity cakes and the annual Bosco Run.**

OUR COLLEGE

Suportive college
'Repassem Junts'

Salesians Sarrià is involved in two solidarity-based initiatives that are carried out directly in the college: "Repassem Junts" and "Share the Light". The idea is to promote the value of solidarity among the educational community.

"FEM CULTURA AMB ELS COLORS DE LA UNESCO AWARD". 2019 EDITION

"Repassem Junts"

This project is the result of a joint collaboration between Salesians Sarrià and the Social Services of Sarrià district. For three years now, "Let's Revise Together" has been offering children from the neighbourhood a space for being together, education and recreation. The college provides boys and girls with a space where they can do their homework with the help of some of the Baccalaureate Students who help out in the programme. They also treat them to an afternoon snack and play time at the college. **The project was awarded the "Fem Cultura amb els colors de la UNESCO" accolade.**

The Bosco Run

At the end of January, around Don Bosco day, we also organise the Bosco Run charity race. The event reached its fourth edition in 2019, with more than 150 runners, attesting to the consolidation of the activity, which has become a veritable example of fair play and solidarity. The objective of the run is to achieve funding for the "Repassem Junts" project. It is intended for people of all ages and is split into different categories. **The fifth edition was held on January 26, 2020.**

OUR COLLEGE

Suportive college Share the Light

Share the Light is the **volunteer work project** that the Salesians Sarrià has been carrying out in the city of Mazabuca (Zambia) for five years now.

Students from the Higher Level VET, accompanied by their teachers, travel to Zambia every summer to engage in maintenance, volunteer work and international cooperation at the **Hijas de María Auxiliadora orphanage in the city of Mazabuca**. *City of Joy* is a care home for girls in a situation of risk and social exclusion.

The Salesian community centre provides them with a homely and safe environment that helps them to grow personally and to work in order to accomplish their professional and personal objectives.

The project is possible thanks to the **collaboration of the college with the Salesian College Farnborough** in England and the collaboration of the educational community and the economic contribution of different companies.

SCHOLARSHIP PROGRAM

The purpose of the programme is to provide support to young girls lacking in resources or future options in order to **embark upon an educational career** and therefore improve their professional prospects. We have been working to help these girls to be able to start to study a professional career.

NUTRITION PROGRAM

Disease or lack of work are two of the main stumbling blocks preventing young girls in Zambia from progressing and evolving on a personal and a professional level. City of Joy seeks to identify **the neediest and most vulnerable families** and helps them through the donation of food, clothes, blankets, somewhere to live, etc.

PORRIDGE CLUB

In the city of Mazabuca, more than 700 young boys and girls can attend the college free. The "Porridge club", as this project is known, provides these minors with a **free education as well as a daily meal at the college**, in many cases the only square meal that they get all day due to family circumstances.

OUR COLLEGE

Committed to sustainability

Sustainability is one of the **cornerstones of the Salesians Sarrià** and is a facet which, year after year, we strive to implement in all areas of the college, as well as to consolidate community engagement in all the actions that we carry out.

Thanks to the involvement of the pupils, teachers and members of the administration and services staff we get results in different areas. We thus promote a sustainable college that is committed to zero waste through the effort of the entire educational community.

SALESIANS SARRIÀ HAS BEEN ACKNOWLEDGED AS A MEMBER OF THE ASPNET

Salesians Sarrià has been acknowledged as a member of the ASPNet (UNESCO Associated Colleges Project Network) which promotes international cooperation and peace through education.

LAST PROJECTS:

GREEN ROOF

It began last year and is the first project that is not limited solely to the college. **It is the first green roof of the "Green Roofs" project of the City Council of Barcelona** and also has a pedagogical purpose. The students of the Higher-Level VET in Renewable Energies do some of their classes in this area.

TREE PLANTING:

In order to have a more sustainable recreational area in the college, besides the green roof area, **ten trees** have been being planted in the college yard, in an action framed within our sustainable college project and which helps to promote a greener environment.

BICYCLE AND ELECTRIC SCOOTER PARKING:

In the future we intend to install a parking facility for bicycles and electric scooters in the yard. In this space, students, teachers and administrative and services staff will be able to recharge their vehicles thanks to the power produced by the photovoltaic panels.

FUTURE ACTIONS:

ICTA AGREEMENT:

The college is working with the Institute of Environmental Science and Technology to develop a **new green space**. The aim is to adapt the wall of the downstairs yard that leads out to the street in order to build a vertical or metallic wall that is also connected to the outside and hang plants on it.

SUSTAINABLE WASTE MANAGEMENT

We are working to implement **drinking water fountains** to dissuade students, teachers and members of the administrative and services staff from using disposable plastic containers. Moreover, another ongoing study features the installation and operation of a 3D printer that can recycle plastic bottles in order to reuse waste.

DON BOSCO GREEN ALLIANCE

Salesians Sarrià is part of the Don Bosco Green Alliance movement, an international group of young people of the Salesian family institutions which contributes to environmental action, thought and policies all over the world. Its mission is to create a safe environment that looks after life on our planet, while also forging a new generation of citizens and leaders who are committed to the environment.

OUR COLLEGE

International relations

The internationalisation of the educational community is an essential part of the college's project and is nurtured through participation in international initiatives as well as through the promotion of foreign languages.

The Salesians Sarrià International Relations department works to ensure that students receive a **human, professional and intercultural training that will enable them to access the European employment and academic market** without any constraints. To this end, we collaborate in training our students in foreign languages by means of different programmes.

EXCHANGES: PERSONAL AND ACADEMIC ADVANCEMENT

We provide students with the possibility of going on exchange programmes with European college to bolster their **international spirit and give them the chance to get acquainted with new cultures**. The experience involves two periods: our students go abroad and also host foreign students at their own homes.

LANGUAGE COURSES IN THE COLLEGE

Our training proposal is geared towards promoting the development of our students and their professional projection. We therefore offer **conversation classes in English, French and German and preparatory classes for the First Certificate and Advanced Exams**. In order to guarantee the best results, our teachers are qualified and experienced native speakers, and the classes are organised in small groups to facilitate the group dynamic.

ERASMUS+ PROGRAMME

Vocational Education and Training students can do their work experience abroad through the **Erasmus**

Programme. This gives the students a possibility of picking up work experience in European companies. This programme was deployed by the European Commission and is intended to give students a broader approach and a greater capacity to establish social relationships.

TEACHER TRAINING

We give our own teachers the chance to participate in **international programmes** where the classes are taught in English. This also guarantees that students are learning quality English in the classroom. They can also take part in English classes at the college to hone their language skills.

MULTILINGUAL COLLEGE CERTIFICATE

We have the Multilingual College Certificate awarded by the Escola Cristiana de Catalunya Foundation in recognition of our effort in promoting the internationalisation of the educational community through participation in international projects and language-learning.

OUR COLLEGE

International stays year 2019-2020

In the course of last year, Salesians Sarrià participated in different projects, activities and meetings in an international setting to promote the learning of foreign languages and learning how to cope and grow professionally beyond our borders.

TALENTS FOR EUROPE

The college Director, **José Abascal**, and the Head of Higher VET Studies, **Josep Cartaña**, travelled to Austria as part of the **Talents for Europe** programme. The intention of the project is to establish relations between the Spanish and Austrian Vocational Training Systems. The Salesians Sarrià delegation visited different installations and companies that host students on work experience schemes, as well as Vocational Education and Training colleges.

EFVET CONFERENCE

The head of Dual VET, **Miguel A. Buendía**, attended the 28th Annual **EfVET International Conference** held in Portugal, titled "Robots. Human. Capital and Digital Learning" in order to share experiences and strategies related to the future of Vocational Education and Training with the other EfVET partners. This meeting yielded several possible international collaborations through the ERASMUS+ European Programme.

STAY IN CZECH REPUBLIC

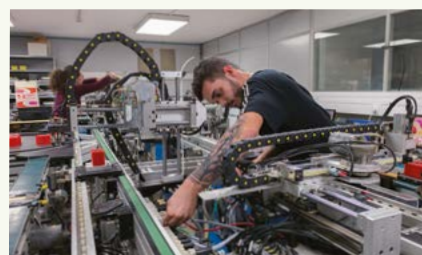

The IT teacher **Santiago Fuentes** travelled to the Czech Republic to attend the meeting organised by the City Council of Prague with the support of the **Xarxa FP**. Attendees from eight European colleges got the chance to find out more about their educational system and the characteristics of Vocational Education and Training in the Czech Republic.

ERASMUS+ EUROPEAN PROJECTS

KA1 - PROJECT

The students from Higher-Level VET from different specialities got **work experience in a foreign company** over a three-month period in order to hone their professional and language skills. It is their first contact with the job market, and moreover in a European setting. The students say that the experience is a very enriching one that helps them to solve problems..

KA2 - 'COME TOGETHER' PROJECT

Twenty students from the first-year Spanish Baccalaureate will carry out a European project with the **Fritz-Winger-Gesamtschule German college** in Ahlen. They will be **working on the importance of Europe, democratic values** and the building of a common project through workshops, conferences and talks in this German city. It is a K2 project of the Erasmus programme and is funded by the European Union Erasmus+..

PENNY PRESS MACHINE

This year, students from the Middle-Level VET in Mechanisation and teachers from the Mechanics and **Automotive Department are participating in the ERASMUS+ Penny Press Machine** European project which is intended to design and build a machine to press cents and will be implemented with the collaboration of five European colleges. The project will be carried out in the different cycles of the module and will run for two years. A total of 5 meetings are scheduled to be held in the course, the first of which was held in Luxembourg in November 2019.

- Berufsbildende Schule Technik-Gewerbe-Hauswirtschaft-Sozialwesen Bad Kreuznach (Germany)
- HTBLuVA St. Poelten (Austria)
- Lycée Louis Rascol (France)
- Lycée technique des Arts et Métiers (Luxembourg)
- Byåsen videregående skole (Norway)
- Salesians Sarrià (Spain)

VISIT TO A DUTCH COLLEGE

Last November, the college assistant director, **Francisco Álamo**; the head of International Relations, **Laura Ramírez**; the head of the Mixt Department, **Núria Gallinat** and the IT teacher **Jordi Molinero**, all visited the **Nova College Paxlaan college in Amsterdam** to set up a collaboration with the different departments of the college.

PRACTICE ENTERPRISES TRADE SHOW

The second-year students of the Middle-Level Business Management and Higher-Level Business and Finances VETs attended the Luxembourg Practice Enterprises Tradeshow to implement the make-believe **companies methodology** and to make contact with other colleges and companies. The meeting also served to practice English, which is indispensable in training and in business in Europe.

02

EDUCATIONAL OFFERING

Innovation and entrepreneurship are the two cornerstones of our training offer. Salesians Sarrià offers Middle- and Higher-level VET, the Spanish Baccalaureate and the International Baccalaureate.

More than 90% of the training cycles imparted at the college have been adapted to Dual VET, a methodology that facilitates access to the job world before the students actually complete their education. Cooperative learning, employed to encourage students to work together and in coordination, will provide Baccalaureate students with the training they need to be successful in companies in the future.

SPANISH BACCALAUREATE

MIDDLE AND HIGHER-LEVEL
VET COURSES

INTERNATIONAL BACCALAUREATE

EDUCATIONAL INNOVATION

VET COURSES

FP DUAL

BACCALAUREATE

The aim of the Baccalaureate courses is to prepare students for higher university studies or higher education. We offer 6 itineraries::

- TECHNOLOGY
- SCIENTIST
- HEALTH SCIENCES
- SOCIAL SCIENCE
- HUMANITIES
- THE ARTS

INTERNATIONAL BACCALAUREATE

The International Baccalaureate trains young people to have broad-ranging and extensive knowledge, an international mentality and attaching great value to research. These educational courses provide them with access to national and international universities. The college offers three groups of 26 students who are doing the IB course.

MIDDLE-LEVEL VET COURSES

The Middle-Level VET courses provide students with the qualification of technician. Most of our courses are based on the Dual methodology.

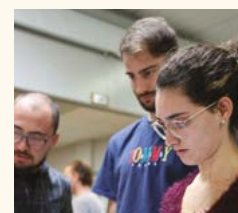

- ADMINISTRATION AND MANAGEMENT
- INFORMATION TECHNOLOGY AND COMMUNICATIONS
- ELECTRICITY AND ELECTRONICS
- MECHANICAL MANUFACTURE
- TRANSPORT AND VEHICLE MAINTENANCE
- GRAPHIC ARTS
- SOCIO-CULTURAL SERVICES AND COMMUNITY SERVICES

HIGHER-LEVEL VET COURSES

Higher-Level Vocational Education and Training leads to the qualification of higher technician. Most of our courses are DUAL VET.

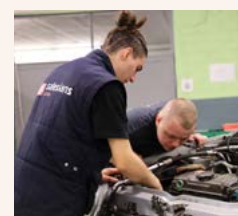

- ADMINISTRATION AND MANAGEMENT
- INFORMATION TECHNOLOGY AND COMMUNICATIONS
- ELECTRICITY AND ELECTRONICS
- TRANSPORT AND VEHICLE MAINTENANCE
- GRAPHIC ARTS
- ENERGY AND WATER

PFI

These programmes are intended for young people over the age of 16 who did not obtain the college leaving certificate:

- AUXILIARY REPAIR AND MAINTENANCE OF LIGHT VEHICLES
- ASSISTANT IN ASSEMBLY OPERATIONS OF ELECTROTECHNICAL INSTALLATIONS IN BUILDINGS

LIFELONG LEARNING

We promote courses for professionals who wish to retrain in their profession or explore new avenues:

- PROFESSIONALISM CERTIFICATES LEVELS 1, 2 AND 3
- PERSONALISED TRAINING
- STANDARD TRAINING

EDUCATIONAL OFFERING

Spanish Baccalaureate

The purpose of Baccalaureate studies is to provide students with integrated and multi-faceted training so that they can go into higher University education with the necessary guarantees and knowledge.

When they finish compulsory secondary education, students need to choose their future path and post-compulsory education courses: **Baccalaureate or Vocational Education and Training**. One of the options afforded to young people is Baccalaureate studies.

Salesians Sarrià offers **six Baccalaureate itineraries: technology, science, health sciences, social sciences, humanities and the arts**. These studies have a duration of two academic years and are divided into two different areas: one containing subjects that are common to all the courses and another specialising in the subjects more related to each area.

Baccalaureate classes seek to motivate students and are also designed to engage the students and all the class in order to facilitate learning of the different subjects. Thus, besides learning how to work as a team, they become independent students.

Language-learning is one of the college keys to learning. English is an indispensable language in academia and in employment. This is why we promote language-learning in the classes. The college's work in this area has led it to be certified as a **Multilingual College** by virtue of the effort made in international projects and in the promotion of foreign languages.

Salesians Sarrià teaches the Spanish Baccalaureate in the mornings from Monday to Friday, from 8.00 am to 2.30 pm, whereas some afternoons are used for the Research assignment.

Students that wish to do this course must hold the **(Spanish) Compulsory Secondary Education (ESO) certificate** or have completed a **Middle-Level VET course**.

COOPERATIVE LEARNING

This methodology promotes both pupil independence and teamwork. The classes are intended to motivate students to nurture their own and their classmates' potential.

EDUCATIONAL OFFERING

International Baccalaureate

The International Baccalaureate prepares students to further develop their intellectual, personal, emotional and social skills in a global setting.

Salesians Sarrià is an authorised Centre for teaching the **International Baccalaureate® (IB) Diploma Programme**. These courses are designed to promote independent and international personality in a cooperative setting. The Diploma Programme targets young people aged between 16 and 19 years who wish to train in an **environment that furthers their international vocation and also achieve** a high degree of personal and social responsibility. The objective of these courses is to develop their depth of thought and to build a solid base for their growth.

The **International Baccalaureate** is a two-year course recognised for the Spanish Baccalaureate (LOMCE) + the general phase of the PAU (University Entrance Examination). The following requirements are needed to be eligible for these courses:

- Hold the title of Compulsory Secondary Education (CSE) or equivalent or have studied in foreign educational systems.
- Pass an initial interview.
- Have a suitable CSE record.

**THE BEST ACADEMIC OPTION:**

The IB qualification will enable students to enter national and international universities.

**SUPPORTIVE STUDENTS:**

The IB helps to form reflexive, open-minded and supportive students who can contribute to a better and more peaceful world.

**MOTIVATIONAL LEARNING:**

It generates an active learning attitude in a collaborative environment that stimulates the students' critical spirit and independence.

**INTERNATIONAL MENTALITY:**

The IB promotes and develops an international mentality. It promotes exchanges with other colleges and language-learning.

**DEPTH OF THOUGHT:**

It teaches students to think deep and also acquire a very solid grounding for intellectual, emotional and personal growth.

**GOOD COMMUNICATORS:**

They express themselves with confidence and creativity and are empathetic and respectful of others.

EDUCATIONAL OFFERING

VET courses

Vocational and Educational Training (VET) is intended to help students to train for a profession in a practical and motivational setting. Salesians Sarrià has a broad range of VET courses, 90% of which are imparted in the dual modality.

DUAL MIDDLE-LEVEL VET

The objective is for students to acquire the knowledge they need **to find a job**.

Access to these courses is through the **Compulsory Secondary Education Certificate (CSE)** or its equivalent. Students may also be eligible for Middle-Level VET if they pass an entrance examination.

Passing the training programme qualifies them as **technicians**.

Salesians Sarrià offers these courses from Monday to Friday, **from 8:00 am to 1:00 pm**.

Academic opportunities:

1. A Higher degree through direct access or through an entrance examination.
2. Any other Middle-Level VET or Baccalaureate.

DUAL HIGHER-LEVEL VET

These courses are intended for students who seek a **practical higher education** that will enable them to make their way in the job world. The students are awarded a middle-management certification.

Access to these courses is with the **Baccalaureate qualification**, a **Middle-Level VET** or by entrance examination.

After passing the Higher-Level VET students receive the qualification of **higher technician**.

Salesians Sarrià offers this education in the afternoons, from Monday to Friday, **from 3:30 pm to 9 pm**.

Academic opportunities:

3. Direct access to university education with official recognition of credits depending on the source education.
4. To any other Higher-Level VET

NEW HIGHER-LEVEL AUTOMOTIVE VET

Beginning in the academic year 2020-2021, we will be teaching the New Higher-Level Automotive VET course. This new cycle is structured to ensure that the students acquire the knowledge they need to work in the sustainable automotive industry. To this end, the new VET will place emphasis on the new non-pollutant mobility possibilities.

REASONS TO STUDY VOCATIONAL EDUCATION

EDUCATIONAL OFFERING

Educational
Innovation

Salesians Sarrià's training offer is based on innovation. Our challenge is to train young people who will be in a position to provide solutions to companies and to society.

Our constant work and the consolidation of innovation-based studies have been acknowledged by the Department of Education of the Government of Catalonia in the form of the **Certificate of Pedagogical Innovation**, awarded to the college by dint of its projects and methodologies applied to Vocational Education and Training.

Salesians Sarrià has been working for seven years now with **Project-based Learning (PBL)** applied to the VET courses. This methodology is based on learning by competencies and is implemented according to current

entrepreneurial needs. The objective is to train young people who will manage their own learning and will be capable of dealing with any problems they encounter. .

90% of our Vocational Education and Training is given in the Dual modality. The purpose of this format is to improve students' competencies and how they interact with companies. Students who work in Dual VET alternate between in-class and in-company training. This affords them an added value in their professional future, while also catering to the needs of the collaborating companies.

MetròpolisFPLab

Raúl Adame and **Àlex Puertas**, students from Middle-Level VET in Digital Pre-Press, won the design of the **logotype of MetròpolisFPLab**. Both students were selected to represent the image of the project organised by the Fundació BCN Formació Professional and with the support of Innobaix, the Port of Barcelona and the Circuïto de Barcelona-Catalunya.

An App for a robotic arm

The students from the Higher-Level VET in Automation and Industrial Robotics have created a robot that interacts and plays with the user. It is an **App for a robotic arm which dispenses chocolate** to clients and is intended to bring robotics closer to young children. It also has a Bluetooth system that allows the robot to be controlled from a tablet.

EDUCATIONAL OFFERING

Dual
VET

More than 90% of our Middle-Level and Higher-Level VET courses are taught in the dual modality. These courses combine in-college and in-company training and facilitate access by young people to the job world.

Dual training is an opportunity to **improve our students' competencies** as well as their relationship with the company, affording them access to companies from the very beginning of post-compulsory education.

The Dual modality enables students to **alternate between training in the college** and more theoretical classes and more production-related training and activities in the company.

Salesians Sarrià has a **Dual VET coordinator** tasked

with managing the courses, reaching agreements with companies and institutions, and also with training the company tutors. This figure is essential in providing support to everyone involved in these courses..

They are part of the **Dual VET Alliance** in order to improve young people's employability. It is an integrated organisation for companies, institutions and educational centres that seeks to improve young people's employability through a quality education.

THE ADVANTAGES OF DUAL VET

STUDENTS

- More opportunities of finding employment
- Access to new professions
- Do in-company stays, including registration with the Social Security and financial remuneration
- More stable workplaces

COMPANIES

- Cover their internal demand for specialised personnel
- Increase the company's innovation capacity
- The company assumes Corporate Social Responsibility
- Social Security allowances for learners

COLLEGES

- Provide students with greater employment options
- Afford the educational centre even greater prestige
- Promote innovation in education
- Increase student demand for the courses offered in the dual VET system.

A man with dark hair and a beard, wearing a grey sweater, is focused on working on a robotic arm. The arm is white and orange, and he is using a tool to adjust it. The background is slightly blurred, showing what appears to be a workshop or laboratory setting.

04

RELATIONSHIP WITH BUSINESS

Salesians Sarrià works with companies and institutions in order to help students break into the job market. To this end, we have initiated different programmes that bring students closer to companies.

We implement different work-experience programmes with more than 400 companies that we work with in order to recruit young people with talent to their companies. In this regard, we also strive to improve young people's access to employment through our Employment Exchange and Conferences such as Salesians Sarrià x Enterprise, which showcases the advantages of Dual VET to the business world.

 RELATIONSHIP WITH BUSINESS

College - company Department

Job placement is one of young peoples' major concerns when they complete their education. Salesians Sarrià is working to make access to the job world more straightforward and without involving a major upheaval for young people. In order to accomplish this, we work with companies and institutions in order for them to help students.

Our **College-Company department** has been conceived to foster awareness of job world requirements, the most necessary and sought-after profiles, as well as the skills that candidates should have. This knowledge is used to promote student job placement and to offer them their first paid employment.

In most cases, the **FCT** or **Dual VET** are students' first-ever contact with the job world. Through these programmes, which provide Middle-Level and Higher-Level VET students with work experience, the companies

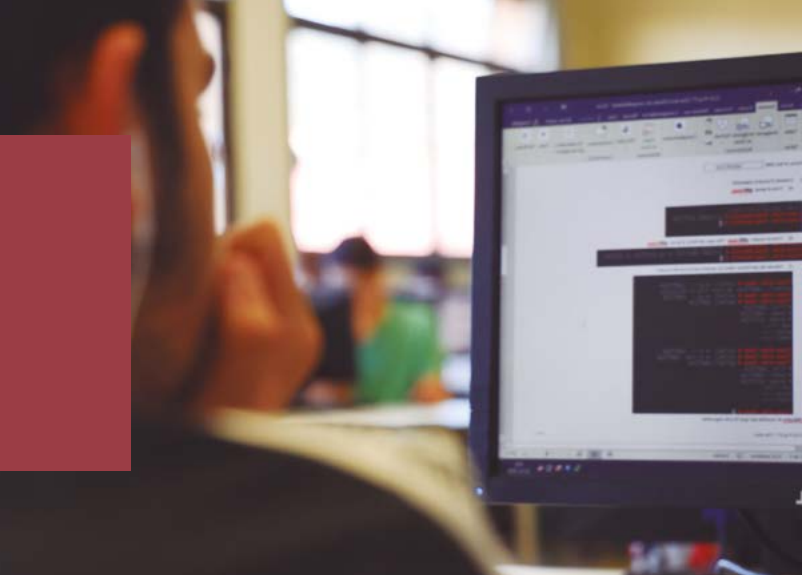

that work with the college can source talent that they can use and we help them to find the profile they are looking for.

The service offered by the College-Company Department engages exclusively in **establishing and maintaining the link between students and companies**. In this way, we get organisations and institutions to collaborate in the learning process, and they also provide young people with guidance, assisting them throughout their stay with the company.

RELATIONSHIP WITH BUSINESS

Employment Exchange

The relationship with companies is fundamental in **achieving quality employment** for young people. One of the objectives of Salesians Sarrià is for students, once they have completed their education, to find a job suited to their training, skills and professional career.

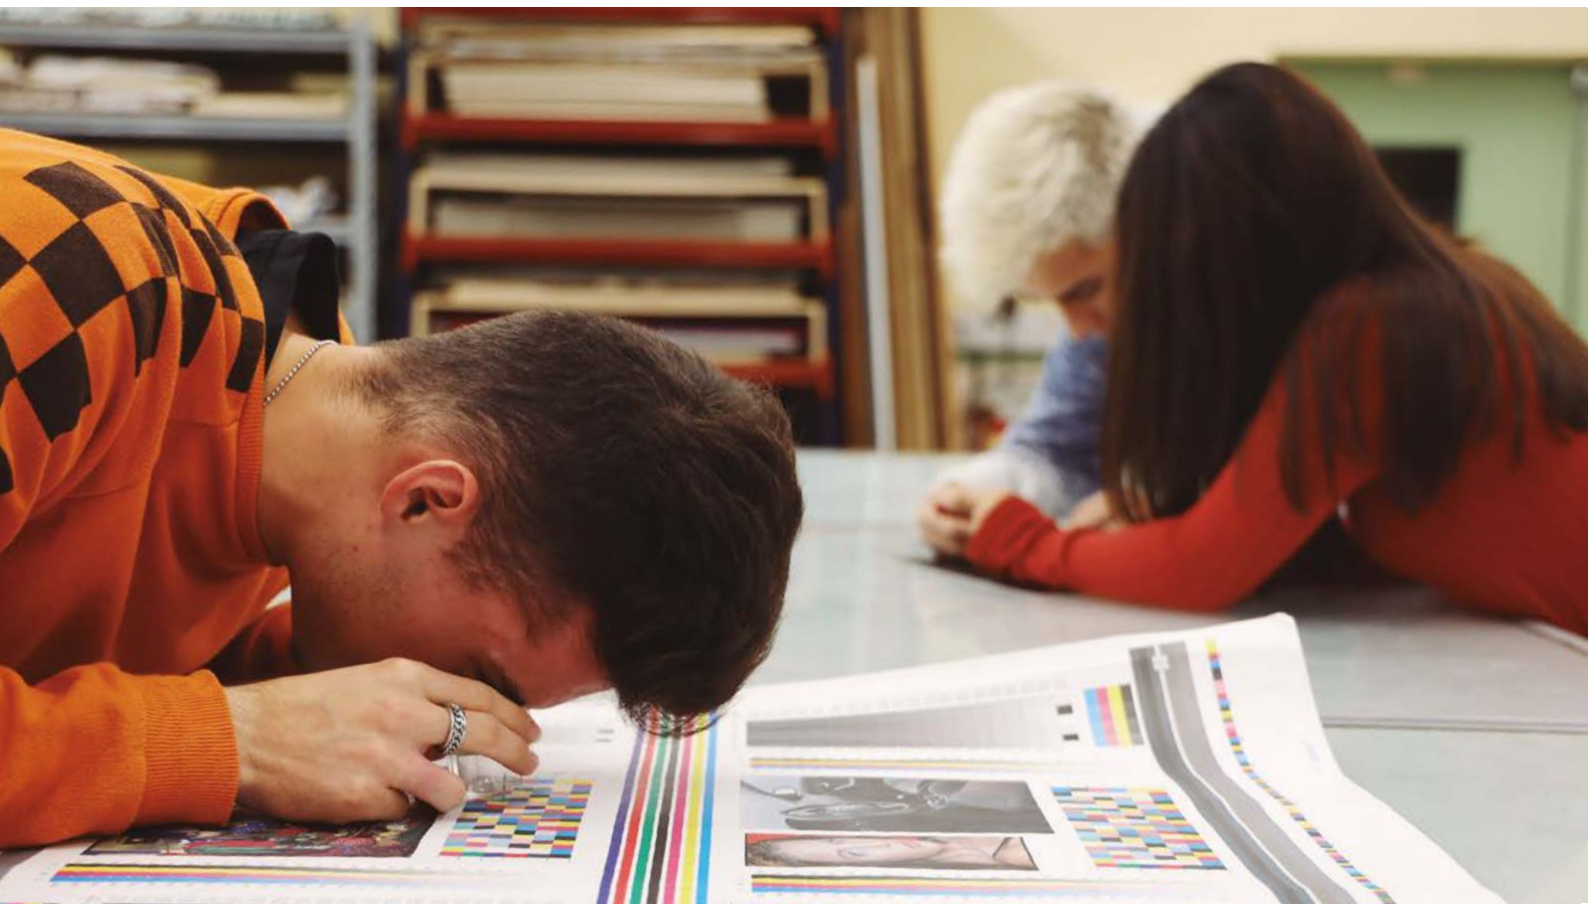

All the students and former alumni of Salesians Sarrià have an **online platform that enables them to contact different companies**. Here, they can register as job-seekers, include their résumé, list their skills and capacities and also specify what type of job they are looking for.

This space is also useful for companies, since they can send our **College-Company Department** their job vacancies, specifying the profile they seek. The

college personnel take care of drawing up a short-list for the profile being sought from among the candidates, and ultimately identify the student that is **best suited to the vacancy**.

Collaborating companies can access this service. Their involvement in the **employment exchange** allows them to source with highly-qualified professionals who are endorsed by the college.

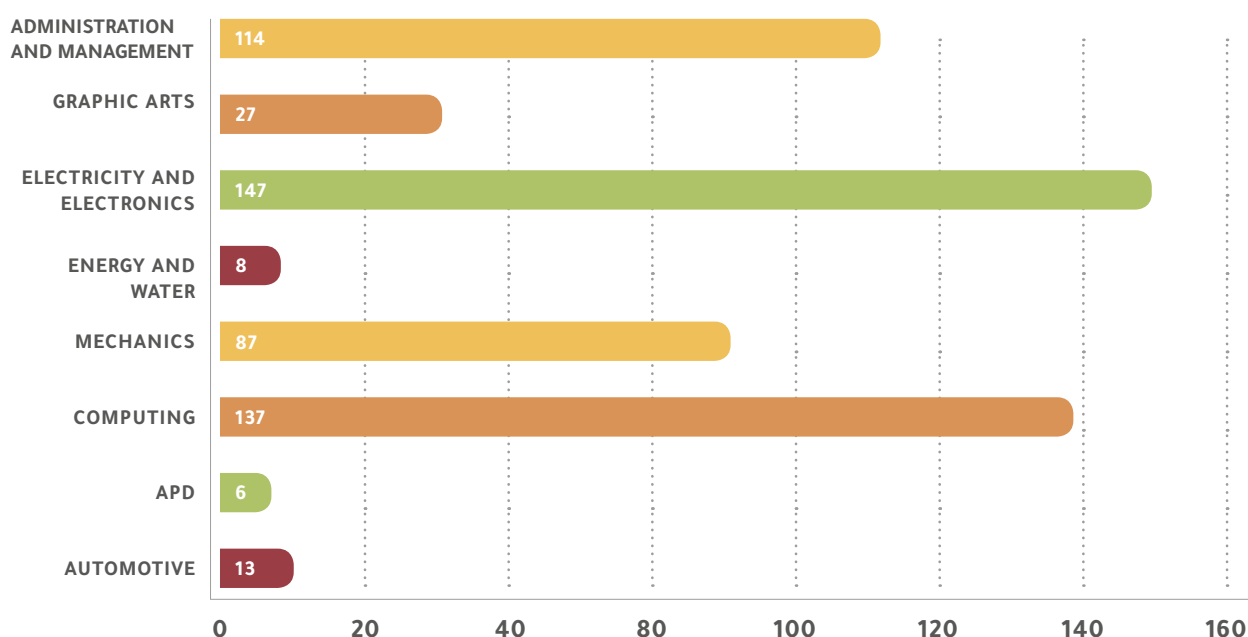

As far as the students are concerned, the employment exchange has a set of **advantages that guarantees them contact with the job world** before they complete their education. They are informed of vacancies related to their speciality and are also provided with the support and the guidance they need when looking for a job..

CONTINUOUS IMPROVEMENT AS THE MAINSTAY OF QUALITY

The backbone of our quality policy is the **pursuit of excellent and being able to cater to the needs and expectations** of students, families and enterprises.

In 2009, the Salesian Colleges of the Barcelona Inspectorate were the first group of colleges and colleges in Catalonia to obtain the Multisite Quality certification under the ISO 0001:2008.

The college is certified pursuant to the ISO 9001:2015 standard, which allows us to manage all our processes comprehensively and effectively. Certification renewals are the endorsement that we will continue to pursue excellence as part of the group of colleges of the Maria Auxiliadora-Zona Nord Inspectorate.

RELATIONSHIP WITH BUSINESS

Salesians Sarrià
x Empresa

Once again this year, we are holding a new Salesians Sarrià x Enterprise working day, a meeting that brings the business and the institutional world together to learn about the different possibilities and advantages offered by Dual VET.

The **fifth edition** welcomed more than seventy companies, which had the chance to hear about the different advantages of Vocational Education and Training for the purpose of capturing young talent.

The day kicked off with the welcome address by the director of Salesians Sarrià, **José Abascal**, who underlined the possibilities offered by Dual VET with regard to the future professional careers of the students doing these courses.

The first talk focused on how student tutoring should be shared by the college and the company. The vision of companies and tutors was explained by **Sergi Reverte**, Head of VET Studies of the Institut Esteve Terrades, and **Lluís Vilaplana**, Head of the Electricity-Electronics Department and college tutor.

The focus then switched to the college students: **Jacobo Cardoza**, **Andrea Urpí** and **Pol Mor** talked about their first experience through the Dual VET programme in Middle- and Higher-Level VET.

Raúl López, head of the College-Company Department of Salesians Sarrià and employment advisor to the Department of Education of the Government of Catalonia, outlined the different types of contracts offered to VET students through which companies find it easier to attract new talent..

To talk about the services offered by Salesians Sarrià to companies, **Eloy González** and **Josep Cartaña**, heads of Middle-Level and Higher-Level VET, respectively,

presented the List of Services and all the collaboration possibilities between the college and the different companies that engage in the training of young people.

At this working day, the company **BJ Adaptaciones** received the college acknowledgement for its commitment to and engagement in Work Experience in the company and in Dual VET. The event closed with a networking space and an exhibition of projects by the students.

JACOBO CARDOZA**Automotive Dual VET student**

"For a few months now, through the Dual VET programme, I have been working in a company that engages in the maintenance and repair of hybrid and electric buses. This experience is one of the best I have ever had because it has helped me to learn a great deal".

**ANDREA URPI****Telecommunications Dual VET student**

"I could hardly wait to start my work experience, thanks also to the attitude of my workmates and my tutor. I did my job experience in a college, and one of my fears was that the work was going to be very repetitive, although this was never the case. I was given different things to do every and I learned a lot. I stayed on in Higher-Level VET and I hope to do my work experience in Dual".

**POL MOR****Telecommunications Higher-Level VET Student**

"I was made welcome by the company from the very first day and I never felt like a student doing work experience. I would recommend Dual VET for everyone, because although it does involve a bit of a sacrifice, it is really worthwhile. It also helped me to advance as a person, and this evolution is thanks to the company and the college".

**SERGI REVERTE****Dual VET expert**

"When Dual VET started, there was already an evident interest among everyone: companies, colleges and students. Being a college tutor is very gratifying, and exercising as one in a company is also a source of personal satisfaction. The company tutors talk about the students as people whom they have the opportunity to accompany in their learning process".

**LLUÍS VILAPLANA****Dual VET college tutor**

"The company tutor is a fundamental figure, the person with this responsibility is helping to plot the student's future. The figure of the tutor is one of a professional who knows his or her job and helps the company to find the talent it needs and to train young people in order to cater to the needs of the job market".

RELATIONSHIP WITH BUSINESS

Services charter

Salesians Sarrià maintains a very close relationship with companies in order to know what their needs are and how the college can help them in talent-seeking.

We work **to adapt our training model to job market needs**, although in order to do so we need to have a direct relationship with different organisations and companies to know what they are looking for and what the needs of each sector or industry are, as well as how we, as a college, can help them.

Since its beginnings, Salesians Sarrià has always sought to implement an **innovative educational action model** which bases the student's education on their relationship with companies and the job world. Through this link we want to help companies to establish a relationship with young people and the world of education.

THIS IS WHY WE OFFER COMPANIES AND INSTITUTIONS DIFFERENT PROPOSALS:

SERVICES TO ENTERPRISES

Besides our employment exchange and the possibility of our students getting work experience, we offer different types of collaboration, such as product testing, sponsoring, the rental of facilities, networking. We also provide them with an assessment service to help them to hire a new worker.

EMPLOYMENT TRAINING AND LIFELONG LEARNING

We offer workers and companies a broad catalogue of courses that adapt to market needs and guarantee retraining. Training is continuous, subsidised and private, and is guaranteed to cover any business need. We also manage each case on an individual basis.

PROGRAMMED TRAINING

Companies are now seeking a higher degree of excellence among workers. To this end, we work to reinforce educational innovation through the classrooms to improve employment quality. Our college adapts its timetables and contents to workers' needs.

ACCREDITATION OF EMPLOYMENT EXPERIENCE

We offer people without formal qualifications a professional aptitude certificate or a VET qualification. This is done through the accreditation and certification of the knowledge and expertise they have acquired throughout their experience.

DUAL VET AND WORK EXPERIENCE (FCT)

We help our students on the work experience (FCT) and Dual VET programmes to get better access to the job market. To this end, we strive to make sure that they can develop competencies as future workers and our team of tutors also works to achieve and improve the relationship.

WORKING RELATIONS

Our International Relations department offers assessment and support to companies that wish to go global. We help them to locate students from other countries, participate in international events or help students to do exchanges.

INNOVATION AND ENTREPRENEURSHIP

Innovation is one of the college's training cornerstones, together with entrepreneurship. We work to bring talent closer to companies and so that they can help by providing their expertise in problem-solving, participating in proposals for new ideas and in executing real-life projects.

EMPLOYMENT EXCHANGE

Collaborating companies enjoy preferential access to our employment exchange, which is comprised of highly-qualified personnel who are endorsed by the college. To cater to these needs, we select the profiles that are best suited to each business need to be covered.

RELATIONSHIP WITH BUSINESS

Coworking: projects

Salesians Sarrià's VET and Bacculaureate courses promote entrepreneurship and innovation from the classrooms to **foster an entrepreneurial mindset**. To help pupils and former pupils who wish to embark upon their own project, we have set up a co-working space that can be used by all the entrepreneurs trained at the college.

The objective of this space is to provide support to students and former students who have come up with an innovative project and need somewhere to implement it. Thus, co-working is geared towards creating a community and facilitating the development of professional competencies in an educational environment adapted, in turn, to their needs.

ADVANTAGES OF SALESIANS SARRIÀ CO-WORKING:

AFFORDABLE
PRICE

OFFICE SPACE

MEETING ROOM

AFTER ONE AND A HALF YEARS OF OPERATION, THE CO-WORKING SPACE'S FIRST PROJECTS ARE NOW EMERGING:

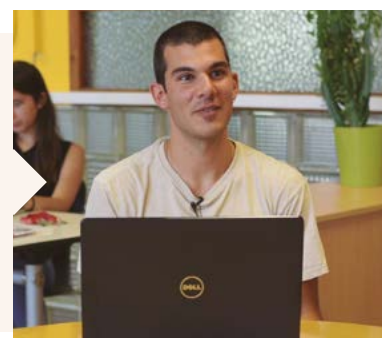

THEBLUEDOTS

The first project developed in the co-working space is now a reality. The co-workers **Adrián Gastón** and **Roger Moreta**, after a year and a half as users of the service, successfully completed their spell in the co-working space following the conclusion of the development phase of their artificial intelligence project. **TheBlueDots** is a data monitoring and processing project for agriculture based on smart devices. We are truly proud to have hosted the **TheBlueDots** team in our Co-working space and their entrepreneurial artificial intelligence project applied to agriculture designed to optimise resources. We are convinced that it will be a resounding success and will respect the sustainability of fields of crops.

E-TUPPER PROJECT

One of the projects currently ongoing at the co-working space is E-Tupper, which heats food with no need for any other device, such as microwave. **David del Campo**, former pupil of the **Automation and Industrial Robotics Higher-Level VET**, and his collaborator **David Prados**, are working on this idea, which is intended to help people who cannot eat at home to prepare their meals either at work or at college.

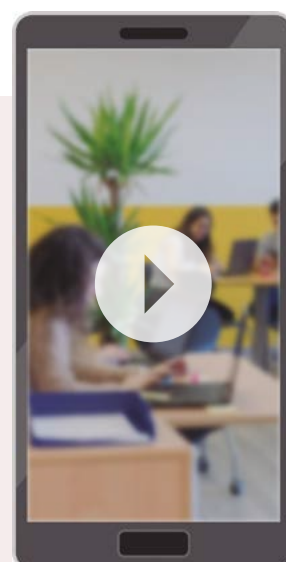

RIDE SAFE

Last December, the third agreement at our co-working space was signed in order to host the **Ride Safe** project. It is the brainchild of **Sergi Ballester** and **Ricardo Ávila**, former VET students at the college. This project is set to revolutionise the world of cycling.

WOULD YOU LIKE TO KNOW MORE ABOUT OUR CO-WORKING SERVICES?

THE EDUCATIONAL COMMUNITY

Salesians Sarrià has 136 years of experience in training young people in post-compulsory education. From the outset, we have always been committed to innovation as the cornerstone of all our education.

The college educational community, comprised of students, former alumni, teachers, administrative and service members and families, is becoming increasingly more deeply rooted in our environment thanks to their involvement in the different activities organised at the college.

LOOKING BACK 2018-2019

PRESS REVIEW

HUMAN TEAM

YEAR 2019-2020

SEPTEMBER 2018

Beginning of the new college year

Beginning of the college year, under the slogan "**Discover yourself**". The cloister featured the welcome and the presentation of the new director of the Salesian Community of Sarrià, **Xavier Brines**, who wished all the personnel a good year. Student welcome week and tutorial interviews.

IV Graphic symposium

Between September 6 and 8, the college hosted the Fourth Research in Graphic Design Academic Meeting, a space for debating trends in the sector. **Luz Irene Arroyo**, a former student of the college, presented her project "**Project Hibot: from the client to the product**".

Salesianas de Sarrià organisations training

Salesianas Santa Dorotea, the EUSS and Salesians Sarrià organised the second training event for the teachers of the three institutions, with the participation of more than 220 people. This year, the speaker was **Miguel Ángel Ariza**, who spoke about the ABP, educational excellence and work team management.

IB students at the EYP Luxembourg Forum

Between August 28 and September 5, **Cai Arcos**, **Julia Aguilera** and **Maika Markes**, International Baccalaureate students, participated in the 1st International Forum of EYP Luxembourg, the largest political debating forum in Europe organised by the European Union.

Graduates in design from the ISEC of Lisbon

Former graphic arts students have obtained the DPG Degree in Design and Graphic Production at the **ISEC, the Higher Institute of Education and Sciences of Lisbon**. Thanks to the agreement signed between both organisations, students from our centre can continue their training in the graphic arts industry in Portugal.

Liderpack Best Young Design

Three students from the Higher-Level VET in Printed Publications and Multimedia Design and Editing designed a sustainable and sturdy packaging for chocolate Easter Eggs. **PackA Egg** carried off the award for the **Best Young Design of the Liderpack** awards.

Language Assistants

This year once again, we benefited from the cooperation of **six language assistants** as part of the college International Relations Programme. The assistants took part in the English classes in the Middle-Level and Higher-Level VET and also in the Baccalaureate.

IV Forum of the Dual VET Alliance

On October 2 and 3, the coordinator of Dual VET at Salesians Sarrià attended the **IV Forum of the VET Alliance** in Malaga. This year's edition was titled "Six years of Dual VET in Spain". In the course of the congress, the key factors, quality and the regulation of the system and employment for young people, among other topics, were analysed.

OCTOBER 2018

Automotive students at the BAUM Festival

The students of the Middle-Level VET in Electromechanics for Automotive Vehicles took part in the **Junior Bike Build-OFF**. This year, in a live demonstration, they took apart, transformed and tuned a Harley Street Rod and a Brixton 125 with parts by Zodial and material by Bike Lift.

Visit from a Danish college

The director of the Danish college **Nykebing Katedralskole, Kirsten Danving**, visited the Salesians Sarrià to define cooperation actions between both centres. The possibility of establishing exchanges of Baccalaureate students and for internationalisation were discussed, among other topics.

CRECIM Workshop

The Baccalaureate students in the health modality held an experimental workshop at the facility of the **CRECIM** (Research Centre for Education in Science and Mathematics) of the University of Barcelona.

Talks on work experience abroad

The mobility manager of the Fundació BCN Formació Professional, **Jordi Castillo**, gave a talk to Middle-Level VET students addressing the benefits of work experience in companies and organisations abroad..

Stay in Austria

Two teachers from the college had a spell in Austria on the occasion of the celebration of the 20th anniversary of the **HTL4EUROPE** programme, together with six European partners. Over a one-week period, different visits were organised to cutting-edge companies from the industry.

"Train for your own safety" workshop

Baccalaureate and VET students took part in the "Train for your own safety" workshop about safe motorbike riding organised by the **Servei Català de Trànsit**. The workshop combined theory and practice to learn about and practice the techniques needed to control and master these vehicles.

NOVEMBER 2018

Training talks for parents

Once again this year, different training **talks were organised about adolescence** for the parents of the college's students. Different presentations were given, dealing with young people's training needs, concerns and how families can cooperate and help them.

4th edition of Salesians Sarrià x Enterprise

The college held the fourth edition of the Salesians Sarrià x Enterprise, which is intended to disseminate good practices in VET. This year's edition was attended by more than 80 companies, with the focus on **CT Ingenieros** on account of its involvement in student training and in-company work experience.

The best entrepreneurs in Europe

The four former students of Baccalaureate who created **"Take this Way"** received their recognition as the best entrepreneurs in Europe at the **Youth Start European Entrepreneurship Award 2018**. Their project is an app whose purpose is to facilitate the payment of public transport in Barcelona.

We open the first green roof

On November 26, we opened the first Green Roof in the **"Green Roofs"** competition organised by the City Council of Barcelona. This space occupies a surface area of 191 m² and there are two wind turbines, a drip irrigation system, an insect hotel plus an aromatic plants area and a vertical wall.

Visit by Sanmenxia College

The college director, **José Abascal**, and the head of International Relations, **Laura Ramírez**, met a delegation from the **Sanmenxia Polytechnic College** in China. The purpose of the meeting was to explain our educational system and the Salesians Sarrià pedagogical innovation model.

IB students participate in the "Gran Recapte"

On November 30 and December 1, the International Baccalaureate students participated in the **Gran Recapte d'Aliments**, the campaign that collects basic food for the needy. More than 4,400 tons of food were collected during this year's edition.

DECEMBER 2018

CPR WORKSHOP

The students from the first year of the Middle-Level VET and PFI took part in a cardiopulmonary reanimation workshop in collaboration with the **Corachan clinic**. It is a workshop pertaining to the occupational risk prevention training unit in the Employment Training and Guidance subject module.

We received the certificate of Pedagogical Innovation

The Department of Education of the Government of Catalonia has acknowledged Salesians Sarrià on account of its **application of innovative methodologies in Vocational Education and Training**. This recognition highlights the consolidated projects that have transformed and improved the quality of the educational system.

Awards for volunteer work

The "Share the Light" project was a finalist in the **Premios Fundación Telefónica al Voluntariado**. The Foundation acknowledged the involvement of the Salesians Sarrià students in awareness-raising and volunteer work conducted in Zambia since 2015.

Food wastage workshop

With the collaboration of the **Waste Agency** and the neighbourhood of **Sarrià-Sant Gervasi**, VET students from the college worked on habits that need to be changed in order to reduce food wastage and to bring about a better world.

Correspondences project

The International Baccalaureate students took part in the "Correspondences" project with the **Fundació Suñol d'Art Contemporani**. The students established a creative bond with the plastic artist Sinéad Spelman and reflected upon the idea of hiding through drawing and photography.

"Ebola beyond Ebola" exhibition

The college hosted the "Ebola beyond Ebola" exhibition by the photographer **Alfons Rodríguez** organised by **Misiones Salesianas**. The set of photographs depicts the harsh reality of Ebola in Sierra Leone, one of the African countries with the highest number of cases of infection of this disease.

Merry Christmas and a Happy 2019

Poi Bardera, a student from the Higher-Level VET course on Printed Publications and Multimedia Design and Editing, was the winning designer of the 2019 Christmas card competition organised every year.

The Bosco Run

The fourth edition of "**The Bosco Run**" charity run was held on January 27. By signing up for the run, participants contributed to funding the "Let's Revise Together" project. This year, the run covered a 5-km route of the streets around the college.

JANUARY 2019

Emilio Calatayud Conference

The Magistrate **Emilio Calatayud**, who is well-known for his rulings based on social work and the re-education of minors, gave a conference titled "Educating is also about knowing when to say no". The conference, held in the college auditorium, was attended by educators, teachers and the families of children and adolescents.

MasterClass by Guarro Casas

Daniel Domínguez, Product Manager of **Arjowiggins-Guarro Casas**, explained the different de luxe coating materials for binding and packaging to the students of the Printed Publications and Multimedia Design and Editing VET.

New Co-working projects

David del Campo, a former robotics student at Salesians Sarrià and an engineering student at the EUSS, and his collaborator **David Prados**, developed their project at the college's co-working space. They have both created a portable and autonomous food-heater which they have registered at the Spanish Office of Patents and Trademarks.

Don Bosco Celebrations

The **Don Bosco celebrations** of January 31 featured games, sports activities and the traditional raffle. This year, a food basket was raffled for "Share the Light". All the proceeds went to the project of the same name which we carry out every year in Zambia.

FEBRUARY 2019

"Share the Light" benefit concert

On February 1, the first **"Share the Light"** benefit concert was held to help to fund the more urgent initiatives that need to be carried out in City of Joy. Students, former students and college staff all participated.

Celebrating 135 years of the college

This year we had cause for celebration, as it was the Salesians Sarrià's 135th anniversary. Since its beginnings, (when it was known) as the **"Tallers Salesians"**, the college has always encouraged initiative and innovation both in its courses and by its students. We now have more than 1,600 students in Vocational Education and Training and Baccalaureate.

Visit by a delegation from Morocco

A delegation from the **OFFPT** (Office for Vocational Education and Training and Employment Promotion of Morocco), representatives of the **Fundació Inform** and the **Fundació BCN Formació Professional** paid a visit to the college to learn about its Middle-Level VET and Business Management courses.

CodeWars programming contest

The International Baccalaureate students participated in the 5th edition of the HP CodeWars programming contest at **Hewlett-Packard's** facility in the town of Sant Cugat del Vallès. The purpose of this competition is to promote students' interest in scientific and technical vocations.

MARCH 2019

“Women who changed the world” exhibition

The college hosted the “Women who changed the world” photographic exhibition sponsored by the Scientific Park of Barcelona. The exhibition plotted the path of different famous female scientists who have made major contributions to humankind through science and technology.

Career guidance talks and visits

The students of the Middle-Level VET courses in Electricity and Electronics attended different tutorials about professional guidance and obtained first-hand knowledge of the industry’s foremost companies. The first-year students of Telecommunications VET visited the **Mediapro** company.

Awareness-raising talks

The second-year Baccalaureate and VET students took part in the awareness-raising talks about volunteer work. The aim of these talks is to expound the experience of **volunteer workers** and to spark students’ interest in supportive actions.

We participate in the ProgramaMEcompetition

Three students from the Higher-Level VET in Development of multi platform applications took part in the 9th edition of the Catalan regional phase of the **ProgramaME** competition, which is for students from VET courses who have to solve problems of varying difficulty.

Talk by Catherine l'Ecuyer

Catherine l'Ecuyer, the expert in education, gave the talk "Educating in attention". This talk was intended for parents and community members and focused on the role of attention in the learning process, because the crisis in education is one of attention, without which there can be no learning..

Kangaroo Competition

The Baccalaureate students participated in the **Kangaroo mathematics contest** held every year in colleges in Catalonia. The idea is to bring mathematics closer to young people and try to kindle their interest in the subject through problem-solving.

"Saló de l'Ensenyament"

A new edition of the **Saló de l'Ensenyament** was held this year between March 20 and 24. Visitors were provided with information about our educational offer and we also cleared up any enquiries or queries they had about post-compulsory education at our college. They also had the chance to check out some of the projects carried out by Salesians Sarrià students.

International Practice Enterprises Trade Shows

Students and teachers of the business VET from our college attended the **25th International Trade Fair of Student Firms**, which was held in Prague between March 19 and 22. Students got practice in entering into contracts of sale and collaboration contracts with the other colleges in attendance. .

Graphispag Fair 2019

Our college's Graphic Arts department attended the **Graphispag** show between March 26 and 29 at the Gran Via Trade Fair Venue in Barcelona. The students that had created PackA Egg carried off the LiderPack award for the best Young Packaging Design.

Blood donation

On 27 and 28 of March, the college's annual blood donation campaign was staged, which is part of the Supportive College project. Every year, Salesians Sarrià collaborates with the **"Banc de Sang i Teixits"** so that students, teachers, administrative and services personal and families can give blood at the college.

Entrepreneurship Conference

The Higher-Level VET students attended the round-table about entrepreneurs as part of the Professional and Technological Conferences. This edition featured the participation of the **USMIMA** start-up and **Randstad**. The second-year students were given the floor to explain their in-company work experience.

Company tutor conferences

The college organised a **conference for company tutors** who participate in the Dual VET work experience programmes. Those who attended the talks heard about the details involved in the agreements and how they have helped our students.

Mobility conference

The International Relations department organised a round-table about the international mobility of students and all its implications. The conference featured the participation of **Jordi Castillo**, **Sam Whiteleuy** and **Xavier Just**, a former student of the college.

Conference on guidance and reflection about VET

The Fundació **ATRESMEDIA**, **Fundación MAPFRE** and **IESE** Business College presented the "Reflections on Middle- and Higher-Level Vocational Education and Training" study at the college. The presentation was part of the conference on guidance and reflection about VET organised every year by the Salesians Sarrià..

Robotics workshop in the hospital

The Higher-Level Mechanic students staged robotics workshops in the play-college of the paediatric ward of the **Hospital Parc Taulí** in the city of Sabadell. This solidarity-based initiative is linked to the volunteer programme implemented in the Hospital's children's ward.

Saint George's Day, supporting others

The college celebrated its traditional **Sant Jordi day** by selling roses and books, with musical performances, literary readings and the Sant Jordi competition award ceremony. Volunteers from Share the Light manned two stalls where they sold roses to collect funds for the project in Zambia.

APRIL 2019

Young Scientists' Parliament

The International Baccalaureate students took part in the **4th edition of the Young Scientists' Parliament**, a programme that prepares young people to play their role of active citizens in the information society by debating and negotiating and discussing science topics.

Sports' night

Students, alumni and college personnel gathered for the **Sports' Night**. The purpose of the event is to share values such as self-advancement, teamwork and solidarity, for which purpose football, basketball and volleyball matches are organised.

MAY 2019

Robotic arm app

The students from the Automation and Industrial Robotics VET course developed an **app for a robotic arm that dispenses chocolate coins**. The application has a Bluetooth system for remote control from a tablet. The purpose of the robot is to bring children closer to robotics.

PFI outing

The electricity PFI students visited the **air-raid shelter number 307 from the Civil War**. The students learn about the history of the shelter, which played a key role in reducing the number of victims in the War when the city of Barcelona was bombed.

Europe Day

For Europe Day, the “Recognition of VET work experience in Europe” conference was organised, featuring the presence of **Laura Ballarín**, Foreign Affairs Advisor to the European Parliament. The students also listened to a reading in the college yard denouncing the war.

Architecture week

Last May 15, and as part of **Architecture Week**, a visit was organised to the college green roof, taking in different areas as well as the photovoltaic panels. Two talks about sustainability were also held in the course of the day.

Mamma Mia Musical

The Moguda Juvenil Salesiana de Sarrià (MJS) drama group presented its musical, now a highly-anticipated yearly event. This year they staged a new version **based on the work of Abba**, telling the story of the wedding between the main characters.

Visit to Orleans

A group of teachers who use the “**learning by doing**” business simulation methodology visited different educational centres in the city of Orleans (France) to see other colleges that also use this methodology and compare synergies and plan possible collaborations.

María Auxiliadora Festival

Once again for another year, the students, teachers and members of the administrative and services personnel took part in the remembrance of **María Auxiliadora**. Different recreational and sports activities were staged in the course of the day. All the participants were treated to hot chocolate and cakes in the college yard.

WORLD ROBOT OLYMPIAD

For the fourth consecutive year, the college hosted the **WRO**, the most important robotics competition for young people. This year, more than 20 teams took part in the qualifying stage of the tournament, building robots using **LEGO** in teams of 2 or 3 members.

JUNE 2019

End-of-year VET projects

The Middle-Level VET students expounded the work that they had done in the course of the 2018-2019 academic year to all of their collegemates. All the projects were underpinned by **innovation and creativity**, two of the core values fostered in these courses.

Student farewell

All the students from **Baccalaureate, International Baccalaureate, and the Middle- and Higher-Level VET and PFI courses** who graduated in the 2018/2019 academic year took leave of the college in an act involving all the faculty and management staff.

mSchool finalists

The two mobile applications proposed, Risking and SportShare, developed by students from Higher-Level VET in Business Administration, Graphic Arts and IT, were finalists in the **mSchool** prizes, a Mobile World Barcelona platform, in the App Education modality.

Student confirmations

Students from the college who participate in the Moguda Juvenil Salesiana de Sarrià (MJS) received their confirmation in the Maria Auxiliadora shrine accompanied by members of the educational community, godfathers and godmothers, family and friends. The celebration was officiated by the **Assistant Bishop, Msgr Sergi Gordo**.

Talents for Europe

A delegation of five Austrian companies and representatives of the **Chamber of Commerce of the Styria region (Austria)** visited the college to pave the way for a possible cooperation in VET between Spain and Austria. The idea is to help young Catalans to be able to find employment in Austria.

Multilingualism

The college held a **conference about multilingualism for the teaching community**. The event featured different talks about strategies and good practices that can be implemented in colleges in order to boost language-learning by students and teachers alike.

THE EDUCATIONAL COMMUNITY

Press review

The projects developed by our students, our commitment to sustainability and the activities organised at the college were publicised in the media.

One of the projects being carried out by students at Salesians Sarrià is a robotic arm controlled by an app designed to bring robotics closer to young children. **Betevé** and **El Economista** were some of the media that carried a news item about this chocolate coin-dispensing arm developed at the college.

El Periódico, **La Vanguardia** and **Entorno Inteligente** also picked up on Take this Way, an app that can be used to pay for public transport via the Internet. This project, which has won international awards, was conceived at the college by former Baccalaureate students in the research project.

The different activities organised by the college have also been covered in the media. The official opening of the green roof made the news in **Metrópoli Abierta**, **La Vanguardia** and **Diari Ara**.

Our annual charity run was also covered in the digital portal **We Run Barcelona**, **El Jardí Sarrià-Sant Gervasi** and **La Vanguardia**.

The conferences about VET and the talk by Catherine L'Ecuyer were also mentioned in Magisterio, **Educación 3.0** and **La Vanguardia**.

The robotics workshops for children admitted to the paediatric ward of the Hospital Parc Taulí de Sabadell, which are taught by students from the college's Higher-Level VET in Mechanics, also made the news in **Diari Ara**, **RAC1** and **Betevé**, which explained the objective of this programme.

PackA Egg, the packaging for transporting chocolate eggs developed by our students, and which won the Liderpack Award for the Best Young Design, also received coverage in media such as **Interempresas**, **Alimarket** and **Aral**.

THE EDUCATIONAL COMMUNITY

Human team

In Salesians Sarrià we have a teaching team with very varied profiles that respond to the needs of each study, this allows us to provide quality training

The **personalized teaching** is one of the added values of the students that we offer in the college, besides being close to the students and their families. To give answer to this goal, all the groups receive a tutorial and personalized action that allows us to adapt to the different individual needs.

Offering a quality education where innovation and entrepreneurship are the fundamental pillars is one of the challenges we work on year after year to ensure that students receive the best teaching. In the college we have a qualified team of teachers who promote the values and professional skills necessary for students so that when they finish their studies at the college they have the skills to face the different professional challenges.

The teaching staff of Salesians Sarrià has experience in post-compulsory education, which allows us to offer **quality teaching, adapted to today's society** and which prepares young people for higher education or the world of work. Furthermore, our team accompanies the student throughout the course, a task that is carried out jointly with the staff of the Psychopedagogical Counselling service and which is also directed at the families of the young people.

The administration and services staff play a very important role in the day-to-day life of the students, as they are in charge of helping them with the registration procedures, encouraging participation in the different activities, assistance and guiding families and students through the administrative procedures of the college.

THE EDUCATIONAL COMMUNITY

Year
2019 / 2020

This academic year 2019-2020, the college has more than 1,600 students in post-compulsory studies. With the Bachillerato or the formative cycles, the students specialize professionally to guide their professional future.

Salesians Sarrià welcomes more than 1,600 students from the Baccalaureate, International Baccalaureate, intermediate and advanced training courses and PFI studies who have continued their training at our centre.

The importance of achieving an education adapted to the needs of the market is key for us, and for this reason we offer a learning process and personal accompaniment to the students that helps them in their professional path..
